We compile this list thoroughly so you can save time and get well-prepared for a Bloomberg interview. Completing this card should give you a good idea of the type of questions you would Array and Strings Bloomberg likes to ask simple, basic array questions. This is the most common type of questions one will encounter in Bloomberg's interview. We highly recommend you to practice First Unique Character in a String, which is a popular question being asked. We **Linked List** Bloomberg asks pretty standard, basic linked list questions and nothing that is particularly tricky. We recommend Add Two Numbers. **Trees and Graphs** Bloomberg may ask questions related to Tree data structure, and these questions can appear quite often in the interview. We highly recommend Validate Binary Search Tree, and Populating Next Right Pointers in Each Node II. Heap, Queue, Stack Any kind of problems which uses Heap, Queue, or Stack data structure goes here. We recommend the problem Meeting Rooms II. Sorting and Searching Top K Frequent... These are frequently asked in Bloomberg interviews. We recommend the problem Sort Characters by Frequency and Top K Frequent Words. **Dynamic Programming** Bloomberg does not ask a whole lot of Dynamic Programming questions. We recommend Longest Palindromic Substring. Design These are some design questions for you to practice for your Bloomberg interview. We highly recommend LRU Cache. **Others** 

Here are some other questions for you to practice to get well-prepared for your Bloomberg interview.
